Thank You

Thank you for purchasing the AirCharger Drive Wireless Charger / In-Car Phone Holder.

What's in the box:

- 1 x Wireless charger and phone holder
- 1 x Ventilation grid clip
- 1 x Type-C charging cable (1 meter)
- 1 x Goose-neck with vacuum suction cup
- 1 x Car charger (Two USB inputs: QC + 5V 1A)

Overview and Features

Product Specifications

Safe charging with Qi wireless charging certification

Fast charging for iPhone and Android devices with 7.5W/15W output power

Auto opening flaps with smart sensor

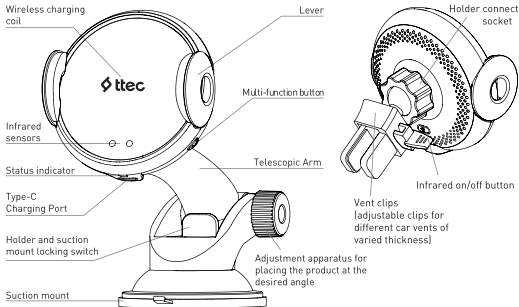

Can be attached to the vent or center console

Adjustable clips for different vent thickness

For all phones supporting wireless charging

Includes 18W in-car charger and type-c charge cable for fast charging

Overview and Functions

Quick Installation

1. Product installation

Attach the wireless charger to the vent holder. Alternatively, you can attach it to the goose-neck arm with a vacuum suction cup. You can also attach the product to the vent clips instead of the vacuum suction cup.

2. Adjusting the product's position

Choose the desired position for product installation and to fix it in place. You can use the wireless charge transmitter in different ways by attaching it to different surfaces.

3. Connecting the power source

Insert one end of the power cable, included in the package, into the charger's charging port. Connect the other end to the QC-enabled charging unit. The charging unit is included in the package. The QC car charger has two USB input ports and allows you to charge both the wireless in-car holder as well as an extra phone.

Using the Product

1. Use with phone

Placing the phone: Keep the phone close to the infrared sensor; when the Flaps automatically open place the phone in position. The flaps will close automatically and grip the phone as soon as the phone is placed in the wireless charge transmitter.

Removing the phone: While the flaps are gripping the phone, press the Multifunction button and keep a firm grip on the phone. You can remove the phone when the flaps open automatically (The flaps can also be opened manually).

2. Wireless charging

This product supports wireless charging. It also supports Qi wireless charging. If placed correctly, your phone will start charging. The phone will remain fixed on the wireless charger during charging. Wireless charging will automatically begin when the Qi wireless charger sensors detect the phone.

3. LED status indicator

- | | |
|-------------------------------|---|
| Initial automatic test | - The red and blue lights flash alternately. |
| Standby mode | - Red light illuminates. |
| Charging / Charging Complete | - Blue light illuminates. |
| A foreign object was detected | - Both the red and blue lights illuminate simultaneously. |

Smart Protection

Smart IC

-Thanks to its built-in smart chip, the product detects the type of device attached and provides the optimal current level for safe and efficient charging.

Voltage Protection

-If the input voltage of the charger is fed a lower or higher voltage than its rated voltage capacity, the red light will light up and charging will pause.

Output Current Protection

-If the output current reaches a higher voltage than the rated current, the red light will light up and charging will pause.

Protection against high output voltage

-If the output voltage of the charger reaches a higher current than its rated voltage, the red light will light up and charging will pause.

Foreign Object Detection

-The Red and Blue lights will both light up when the wireless charger detects a foreign metal object. Charging will pause to prevent overheating.

Specifications

Power Supply Input Voltage:	DC 5V/2A, DC 9V/2A, DC 12V/1,5A [MAX.]
Output Voltage:	DC 5V/1A, DC 9V/1,67A, [MAX.]
Charging Port:	Type-C
Operating temperature:	-10°C - 55°C Wireless charging range
Şarj Dönüşüm Oranı:	%65-%75

Note: You have to use a charger that supports QC or fast charging in order to enable fast charging on your phone.

Safety Precautions

Please read and apply the instructions below before using this product in a car.

1. For safety reasons, please do not install your in-car phone holder while driving.
2. If your phone falls due to user error, highly magnetic materials, electrostatic forces and so on, park your car in a safe place before picking up your phone. If your phone falls, do not pick it up while driving, under any circumstance.
3. Remember that safety comes first when driving. Do not distract yourself with this product while driving and do not pay attention to anything else that might distract you.
4. Please do not install this product on an airbag. Additionally, make sure not to install it on areas that could be affected by a deployed airbag. Otherwise, the driver and passengers could get injured in the event of an airbag deployment, as the product would come loose and be jettisoned forward from its position.
5. Do regular checks to assess whether the product is properly fixed in position, in order to avoid undue interference while driving and to ensure that both driver and passengers are not in danger of injury.

Health, Safety and Environmental Considerations

Please keep your product away from heat sources such as radiators and ovens. Please dispose of your electronic product in recycle bins instead of domestic waste bins due to the negative effects of harmful components on human health and environment

Information about Maintenance, Repair and Product Cleaning that can be Carried out by User

There are no user-serviceable parts inside your product. In the case of faults please contact an authorized service station (Please see the list of authorized service stations) or authorized seller that you purchased your product from.

Periodic Maintenance

After the warranty period, technical maintenance should only be performed by authorized service stations.

Connection and Installation

Connection and installation should be performed by the user as instructed in the user manual.

Please contact an authorized service station for any connection and installation problems. (Please see the list of authorized service stations)

Lifetime

The "LIFETIME" of the device is 3 years in terms of spare parts supply and proper functioning.

INFORMATION ABOUT MAINTENANCE, REPAIR, AND PRODUCT CLEANING

Your product does not require maintenance as long as the instructions in the user manual are followed.

Proper disposal of this product

(Waste electrical and electronic equipment) (Applies to countries that have separate waste collection systems.)

This symbol on the product, accessories or relevant documentation indicates that this product and electronic accessories (e.g. charger, earphones, USB cable) should not be disposed of with other domestic waste. In order to eliminate the harmful effects of uncontrolled disposal of waste on the environment and human health, please separate this product from other waste and ensure that it is recycled for the sustainable reuse of material resources.

Home users should contact the Dealer of this product or local authorities for information on where and how to return this product for environmentally safe recycling.

Business users should contact their suppliers and check the terms and conditions of their purchase agreement. This product and its electronic accessories should not be mixed for disposal with commercial waste. Complies with the WEEE Directive.

INFORMATION ON CONSUMERS' ENTITLEMENT TO APPLY TO CONSUMER COURTS AND CONSUMER ARBITRATION TRIBUNALS FOR THEIR COMPLAINTS AND OBJECTIONS;

Consumers may apply to the Consumer Arbitration Tribunal or Consumer Court in their place of residence or consumption for disputes arising from or in connection with the exercising of rights under warranty

OTHER RIGHTS, IF ANY, BESTOWED TO CONSUMERS

In the event that the Seller fails to produce this Warranty Certificate, consumer may apply to Directorate General of Consumer Protection and Market Surveillance under the Ministry of Customs and Trade.

INFORMATION ON ENERGY-EFFICIENT USAGE OF ENERGY-CONSUMING GOODS

For lifetime energy-efficient usage of the product you purchased, all maintenance services must be carried out by authorized certified personnel. Your device must be operated in environments that meet the environmental specifications in this user manual.

HEALTH, SAFETY AND ENVIRONMENTAL CONSIDERATIONS

Please keep your product away from heat sources such as radiators and ovens. Please dispose of your electronic product in recycle bins instead of domestic waste bins due to the negative effects of harmful components on human health and environment.
